Gajraj Singh Shekhawat

Full-Stack Software Engineer | Backend, Frontend, AI & Data | Tech Advisor

Jaipur, Rajasthan, India · +91 94145 84444 · gaju2gajraj@gmail.com · Portfolio: gajrajshekhawat.com · LinkedIn: linkedin.com/in/gajrajshekhawat · GitHub: github.com/Gajraj-shekhawat

SUMMARY

Full-Stack Software Engineer with 4+ years of professional experience building production systems for fintech, food and retail, and education. Currently at Shuru Technologies engineering Equiti's global multi-asset trading platform; previously built the data platform and backend services for Pickup Coffee (500+ stores, Philippines and Mexico), cutting API latency by 30% and database load by 40%. Strong in Node.js, TypeScript and Python microservices, React, Next.js and React Native, PostgreSQL, MongoDB and Redis, data pipelines (Apache Airflow, BigQuery), cloud (AWS, GCP, Kubernetes) and AI/LLM integration. Independently designs and ships complete products end to end for schools and businesses. Open to full-time roles and remote contract projects.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Backend: Node.js, Express.js, Fastify, NestJS, FastAPI, REST APIs, Microservices, WebSockets, BullMQ/Bull (Redis queues), JWT, OAuth 2.0

Frontend & Mobile: React, Next.js, Redux, Tailwind CSS, React Native, Expo (Android)

Databases & Data: PostgreSQL, MySQL, MongoDB, Redis, Google BigQuery, Apache Airflow, Metabase, ETL pipelines

Cloud & DevOps: AWS (EC2, RDS, S3, SSM), Google Cloud (Cloud SQL, Cloud Storage, Cloud Functions), DigitalOcean, Docker, Kubernetes, GitHub Actions, CI/CD, Nginx, Cloudflare

AI & ML: LLM agents, Text-to-SQL, RAG, vLLM, Ollama, Google Gemini API, OpenCV, Speech-to-text

Observability & Quality: OpenTelemetry, Jaeger, Distributed tracing, Performance profiling, Automated testing

Integrations: Razorpay, Cashfree, WhatsApp Cloud API, SMS/OTP authentication, GST invoicing

PROFESSIONAL EXPERIENCE

Product Engineer - Backend (Software Engineer) | Shuru Technologies Jun 2024 - Present

Gurugram, India (Remote) · AI-native software engineering company serving clients in Asia, the Middle East and Europe

Equiti (Oct 2026 - Present) - Global multi-asset trading platform, broker regulated in the UK, UAE and Cyprus

- Engineer features for Equiti Group's multi-asset trading platform used by traders worldwide.

Pickup Coffee (Jun 2024 - Oct 2026) - Coffee chain with 500+ stores in the Philippines, expanding into Mexico

- Built and optimized Node.js/Express microservices (orders, wallet, vouchers, promotions, stamps) on Kubernetes, reducing API latency by 30% through query optimization and Redis caching.
- Cut database load by 40% and slow queries by 60% by adding a Redis caching layer, indexing and tuning PostgreSQL / Cloud SQL queries.
- Designed the data platform: Apache Airflow ETL pipelines from Google Cloud Storage into BigQuery, plus Metabase dashboards used by the marketing team.
- Developed backend services for the customer ordering app, the in-store barista tablet app and the back office for menus and pricing.
- Implemented distributed tracing with OpenTelemetry and Jaeger across 5+ services, halving time to debug and resolve production issues.
- Delivered the referral program end to end (RFC, flows, campaign APIs, TalonOne integration) with Bull queues for rewards, notifications and coupon tracking.
- Built JWT and OAuth 2.0 authentication and authorization for multi-tenant B2B and B2C applications.

Software Engineering Consultant & Tech Advisor | Independent 2026 - Present

Remote · Technology partner to schools, coaching institutes and businesses (alongside full-time role)

- **Neem Karoli Sales** (Jaipur, wholesale): Designed and built a complete B2B ordering platform solo - two React Native Android apps with self-updates, a Fastify + MongoDB API, OTP sign-in, Cashfree payments, GST invoice

PDFs and 1,290+ automated tests.

- **Shikhar Classes** (JEE/NEET coaching): Built and run the full shikharedtech.com platform - SEO website with server-side rendering, online test platform (Next.js), admissions CRM, JoSAA college predictors, Razorpay admissions, and StreamFit adaptive aptitude test with AI-read OMR sheets.
- **Yugam International School** (CBSE, Kanpur): Built the school website with paid event passes, an AI text-to-SQL agent over 1.7M school records on a self-hosted LLM, CPU-only face-recognition attendance and AI lesson planning; lead a small team building the CRM, HRMS, bus tracking and IoT classrooms.
- **Gram Sansad** (rural governance): Built a multi-tenant Next.js platform giving every village its own website with automated DNS and HTTPS, and migrated the main site off WordPress.

Full Stack Developer | AFM Bigtech Sep 2022 - Jun 2024

Singapore (Remote) · Fintech product MoneyyApp and client Competishun (JEE/NEET coaching, 5 lakh+ students and parents)

- Led backend development of Competishun's online learning platform (LMS) serving thousands of concurrent students.
- Built secure REST APIs connecting the web app, mobile apps and backend, with real-time live classes and instant test results over WebSockets.
- Designed MongoDB schemas and indexes for courses, tests and student progress; added caching and CDN-backed video delivery.
- Built admin dashboard APIs for content and analytics, plus payment gateway integration and subscription management.
- Contributed to MoneyyApp, a fintech platform helping YouTubers and content creators access funding.

SELECTED PROJECTS

- **Portfolio and lead platform** (gajrajshekhawat.com): static site on Cloudflare Pages with CI checks, IndexNow, structured data, chat assistant and Google Apps Script lead capture; Lighthouse 95-100.
- **Yugam Ask**: AI agent answering plain-English questions over 1.7M schools via text-to-SQL on a self-hosted Qwen model (vLLM) with an on-demand GPU to control cost.
- **Face attendance**: marks a full class present from one photo using OpenCV (YuNet + SFace) on CPU, with no cloud AI.

EDUCATION & CERTIFICATION

Full-Stack Web Development | Masai School, Bengaluru - Advanced Web Development Certification Sep 2021 - Aug 2022

ADDITIONAL

Languages: English (professional), Hindi (native) · **Work preference:** Full-time, remote and contract roles; India and international clients (IST, overlaps with Europe, Middle East and Asia-Pacific)
